Product Cleaning and Care

Solatube® Daylighting Systems

Dome

The dome on the Solatube Daylighting System is designed to be self cleaning; however if installed in areas with a high level of debris build-up, the dome may need to be cleaned from time to time. To ensure that irreparable damage to the dome does not occur, the dome can be cleaned using a soft cloth with water and a non-abrasive mild soap or detergent followed by a thorough water rinse.

Tubing

To clean the tubing, simply wipe with a soft cloth. Do not use any cleaning solution.
